Summary:

Detail-oriented Quality Engineer with almost 4 years of experience in **automation and manual testing**, specializing in **Selenium with C#, API testing** with Rest sharp, **MongoDB** database validation, Lambda testing using .Net framework. Experienced in working within the financial services domain, ensuring compliance, accuracy, and security across critical systems. Proficient in designing automated test frameworks, Regression testing, and Agile methodologies. Passionate about enhancing test coverage and efficiency to ensure seamless software delivery.

Experience:

Quality Engineering Analyst

 2023 –Present

 Accenture

NBS (Nationwide Building Society)

- Developed and automated test cases using **Selenium WebDriver with C#**, improving test efficiency by 90%.
- Designed and executed **API testing using Postman and Rest Sharp** validating integration with third party services.
- **Integrated API and UI test automation with the .NET Framework**, enabling modular and scalable test script development.
- Developed **BDD-style** test scripts using **Gherkin** syntax and **Spec Flow** for clear collaboration between QA, developers and business analyst.
- Conducted **functional, system** integration, **regression**, and **UI** testing, ensuring a 98% defect free release.
- Implemented automated testing strategies for **AWS Lambda functions** using rest sharp ensuring robust CI/CD integration and reducing deployment bugs by 60%.
- Performed **end-to-end testing of dashboards and alert systems** using Dynatrace to ensure accurate data visualization and timely notifications.
- Generated **test reports with Spec Flow** and provided regular test updates to clients.
- Developed and optimized **test strategy** development ensuring comprehensive test coverage.
- Coordinated with cross-functional teams and developers to track progress, mitigate risks, and ensure alignment across all phases of the project lifecycle.
- Experience in **TPOR** creating and maintaining TPORs (Test Plan & Outcome Report) to align testing efforts with business and technical requirements.

Quality Engineering Associate

 **28 Oct 2021 – 2023**

 Accenture

M&G Prudential (Financial Services)

- **Developed automated test scripts for Salesforce and Sonata Web applications**, achieving **90% automation** coverage.
- **Conducted API testing using Postman**, ensuring smooth integration with external systems.
- **Assisted in customer integration testing**, validating external API interactions and data consistency.
- **Worked on manual testing of API** using postman and SOAP UI.
- Worked on salesforce application for manual testing.
- Worked on **Regression testing, Defect analysis, reporting defects, defect follow up**.
- **Test report** generation.

- **Maintain and log Bugs** in Jira and getting it fixed on time.

Education:

B. E in Electronics and telecommunication Engineering

Savitribai Phule Pune University

📅 2017-2021

Achievements:

- **APEX Award – H1 FY'25**
Recognized for outstanding performance at Accenture.
- **Accenture Growth Catalyst Award – Team Category – FY'24 Q2**
Honoured as part of a high-impact team.

Key Skills & Technologies:

- **Languages**
C#, JAVA
- **Framework**
.Net, Cucumber, Spec Flow (BDD)
- **Tools:**
Postman, Rest Sharp (API), Selenium WebDriver, Rest Assured
- **Database Management**
Mongo DB, Microsoft SQL Server
- **Test Management Tools:**
Jira, Confluence, Zephyr
- **CI/CD & DevOps Tools:**
Jenkins, Docker
- **Cloud Platforms:**
AWS (Lambda, S3)
- **Monitoring Tools**
Dynatrace, ELK, Cloud watch
- **Version control**
Git hub
- **Soft Skills**
Team collaboration, Independent Ownership, Defect Triage, Agile Practices, Clear Communication

Certification:

REST API Testing using C# RestSharp and SpecFlow

Webservices Testing (RestSharp + Postman)
