WORK EXPERIENCE

IIB/ACE Developer

Teamware Solutions

02/2025 - Present

Pune, India

Roles & Responsibilities : Client - Insurance Domain

- Designed, developed, and migrated **integration services** using **IBM ACE, IIB, and WebSphere MQ**, applying best practices such as schema restructuring and modular subflows for maintainability and performance.
- Gained expertise in **CP4i, Red Hat OpenShift (OCP) clusters, API Connect (APIC), and Mesh IQ**, enabling secure, cloud-native deployments and enhanced observability.
- Performed **end-to-end testing** by conducting **unit tests** and assisting with **integration and UAT**, while maintaining **comprehensive SDLC documentation** (HLD, TDD, architecture diagrams, and mapping documents).
- Automated and executed **deployments in Non-Prod and Prod environments** by creating **Azure build and deploy pipelines**, ensuring reliable and efficient release cycles.
- Implemented **robust error handling, monitoring, and logging frameworks** using **OpenShift and mWorkbench**, improving traceability, minimizing downtime, and strengthening resilience in **high-volume banking and insurance transactions**.

IIB/ACE Developer

Skill-mine Technology

05/2022 - 10/2024

Mumbai, Maharashtra

Roles & Responsibilities : Client- Banking Domain

- Designed and developed **integration flows** using **IBM IIB, ACE, and WebSphere MQ** for core **banking services** including account management, transaction processing, and authentication, ensuring secure and real-time connectivity across systems.
- Built and maintained **REST/SOAP API integrations** with **XML, JSON, and Oracle Database**, enabling seamless interaction between applications and backend systems.
- Implemented **ESQL-based data transformation, validation, dynamic message routing, and error handling**, which improved processing efficiency and reduced transaction failures in high-volume banking operations.
- Collaborated with **cross-functional Agile teams** using **JIRA and Confluence**, while **automating CI/CD pipelines** with **Git, Bitbucket, SVN, and Jenkins**, which accelerated deployments, reduced manual effort, and ensured scalable, compliant, and high-performance middleware solutions meeting stringent banking SLAs.

Trainee Developer

SOFT2Technologies

08/2021 - 04/2022

Amravati, Maharashtra

Roles & Responsibilities:

- Assisted in developing **enterprise applications** using **Java, Spring Boot, SQL, and Microservices**.
- Gained practical experience with Git, Agile methodology, teamwork collaboration, and contributed to coding, testing, and debugging under senior developer guidance.

EDUCATION

BSc(Computer Engineering)

S B E S Collage Aurangabad

07/2018 - 07/2021

Aurangabad, Maharashtra
